

Bonetti Rubinetterie Valduggia S.r.l.

A HISTORY OF EXCELLENCE

50 years of great results.

A history of quality. Technical development, flexibility, customer satisfaction have become cornerstones of corporate policy and the foundations of BRV success on the international and national market.

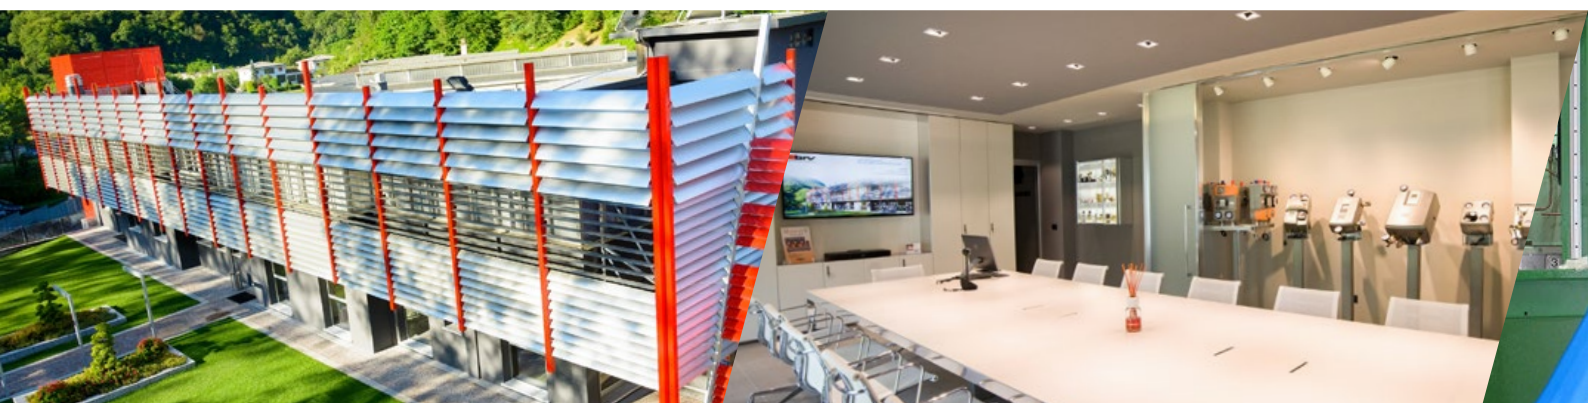

The quality is our leading goal.

BRV, in its current company configuration, was established in 1970, thanks to the management talent of two young entrepreneurs, Roberto Villa and Adriano Scovenna, as a conversion of a small family company working from long time, established by Giuseppe Bonetti.

The modern facility, with its working premises made on a human scale, is located among the beautiful hills situated at the foot of the Italian western Alps, in its production

site of Vaduggia employs about 55 people with a total turnover of 18 Millions Euro. In 1997 BRV achieved the UNI EN ISO 9002 certification.

Since 2003 BRV is UNI EN ISO 9001 certified and several products are approved by the various international and national Standard Institutes: such as WRAS, DVGW, CEN, etc. Every aspect related to company quality is implemented daily in accordance with ISO 9000, to

ModvlvS

Products for heating and cooling systems

- Hydraulic modules from DN20 to DN32
- Distribution boxes
- Thermostatic mixing valves
- Climatic controllers
- Servomotors and controllers
- Distribution headers
- Thermal solar
- DHW stations
- Renewables energies - Biomass
- Flowmeters

Standard Products

Ball valves and thermostatic radiator valves

- Ball valves
- Checkball ball valves
- Ball valves with filter
- Ball valves for meters
- Sigilblock anti-fraud system
- Thermostatic heads, Termostar series

Products are constantly up-dated and are characterized by the traditional BRV quality. Furthermore, customer service and training represent an added value and a BRV strength.

Custom Made Products

Thanks to our highly specialized employed staff, we are able to create a working prototype from the initial 3D project in less than a week (with rapid prototyping techniques in stereolithography or CAM milling on CNC machine).

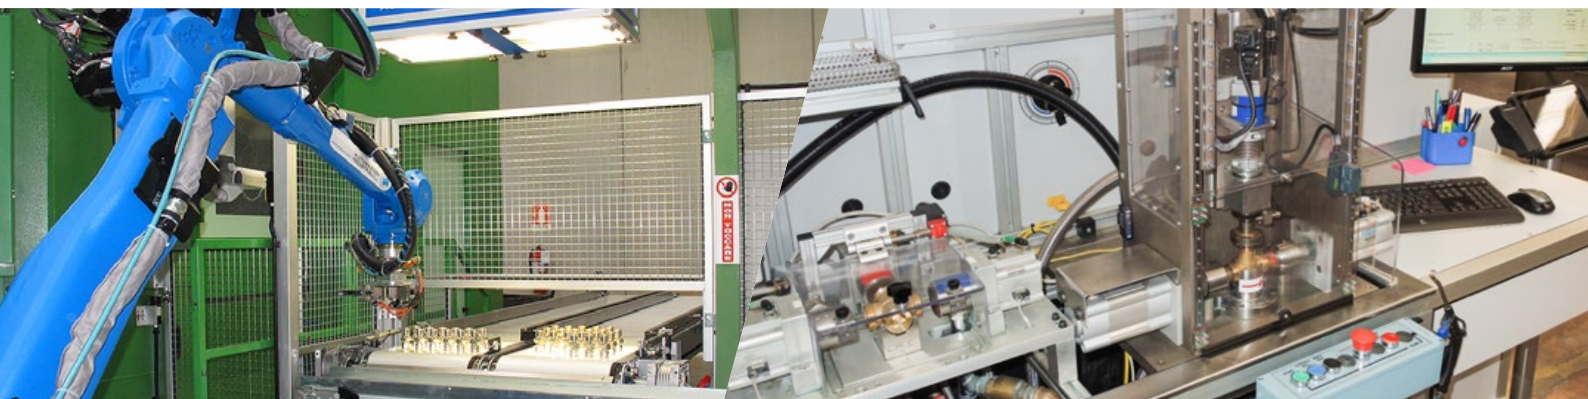

The modern testing laboratory, located inside the factory, can validate the performances of new projects already during the prototyping process.

85% of our production is exported to more than 50 Countries
and we exhibit at the most important international trade fairs.

monitor the compliance of all operations, from design to customer service. A deep and careful corporate renewal started in 2005 has allowed the BRV to achieve excellent commercial results with an average annual growth rate (CAGR) of 9.1% in the 2005-2019 period.

The continuous innovation and modernization of the production processes, the high professional level of employed staff and the efficient activity R&D and technical

department allow BRV to design, develop and produce particularly innovative products, highly appreciated by the market. The excellent results achieved by BRV on high-tech international markets confirm the effectiveness of its industrial and business policy. Modern and flexible managing criteria allow BRV to fulfill markets requests.

ISO 9001:2015 Cert. No. 0853/7

In last few years BRV has invested heavily in IT structuring of internal logistics processes and shipping procedures. The modern WMS management of MAV automatic warehouses allows today to process orders with deliveries within 2/3 days from order receipt for the Italian, Austrian and French markets, for an ever wider selection of products.

BRV will be happy to meet you during the next exhibitions:

MILAN • FRANKFURT • MOSCOW • SHANGHAI
